

## **CHINS Planning Committee**

### **October Update**

The working groups on the intake process and new policies and procedures continued to meet, identifying goals for each group and beginning work on the first steps of policy development. During each sub group meeting there were presentations from the courts and law enforcement on what current practice is as well as which tools have already been developed. For the intake subgroup, the next meeting will be focused on developing the information necessary for the zones to collect at intake and the best way to ensure that data is being collected, including for example ensuring that proper screening is done for potential human trafficking victims. This will also provide an opportunity to again talk about the FRAME system and what the process is for updating it. For the policies and procedures group the focus of the next meeting will be on education and connecting with school representatives on working together.
